WORK EXPERIENCE

IT Administrator

Virtual Freelancer Asia
January 2026 – Present

- Managed and maintained company databases using Google Sheets, ensuring data accuracy and workflow efficiency.
- Administered Google Workspace and Google Drive access, file organization, and user support.
- Managed and configured GoHighLevel (GHL) CRM workflows, automations, and user-related tasks to streamline lead management and improve operational efficiency across teams.
- Developed automation scripts using Google Apps Script and provided remote technical support to internal staff.

WORK EXPERIENCE

Technical Virtual Assistant

Algorithmics - School of Programming for Children
August 2024 to January 2026 (Part-time)

- Provided technical and operational support for a growing EdTech organization, managing CRM activities, learning management systems (LMS), scheduling, quality assurance, and customer support processes.
- Assisted with system administration, troubleshooting, AI-assisted communications, and workflow improvements while collaborating with cross-functional teams to ensure smooth day-to-day operations and an excellent customer experience.

Dynamics 365 CRM Administrator

Vimenture LLC
May 2024 to January 2026

- Served as the primary administrator for Microsoft Dynamics 365 Sales CRM, managing user accounts, lead operations, data quality, and CRM configuration to support daily business operations.
- Collaborated with cross-functional teams to improve CRM processes, maintain data integrity, generate operational reports, and provide user support.
- Proactively expanded expertise through Microsoft Learn, achieving Level 8 with 34 badges, and applied best practices to optimize CRM administration and drive continuous process improvements.

Lead Technical Support Engineer

ACLT Computing Inc.
June 2022 to May 2024

- Led and mentored a team of Technical Support Engineers and Helpdesk Support staff.
- Investigated and resolved complex SQL Server and MyPrimeHR production issues using Microsoft SQL Server Management Studio (SSMS).
- Supported on-premises and SaaS client environments through maintenance, troubleshooting, and system optimization.

Computer Programmer

Arktech Philippines Inc.
January 2019 to November 2021

- Developed and maintained in-house web applications for HR, Accounting, and Production systems.
- Built applications using PHP, JavaScript, jQuery, MySQL, HTML, CSS, and Bootstrap.
- Gathered business requirements and collaborated with stakeholders to enhance internal applications and workflows.
- Administered and optimized MySQL databases for performance and reliability.

Data Technician

SPi Global
December 2017 to January 2019

- Processed and validated structured and unstructured data with high accuracy.
- Converted raw data into standardized formats based on project requirements.
- Performed quality checks to maintain data consistency and compliance.
- Followed strict formatting and data tagging standards.
